WPI Acc No: 2002-575419/200261

Composition, useful as a cosmetic make-up product, comprises anionic and cationic film-forming polymers and a polymer comprising heteroatom-containing hydrocarbon repeat units

Patent Assignee: L'OREAL SA (OREA )

Inventor: COLLIN N

Number of Countries: 101 Number of Patents: 004

Abstract (Basic): WO 200255031 A1

NOVELTY - Composition having a fatty phase comprises (i) an anionic film-forming polymer, (ii) a cationic film-forming polymer and (iii) a polymer (I) with a molecular weight below 100,000 comprising heteroatom-containing hydrocarbon repeat units and optionally pendant and/or terminal fatty chains (optionally functionalized) of 6-120 carbon atoms.

USE - The composition is useful as a cosmetic make-up product, especially a mascara, eyebrow product or hair product.

ADVANTAGE - Polymer (I) improves the adhesion of the composition to keratinic materials, especially fibers (e.g. eyelashes), allowing the composition to be applied rapidly.
